## **Spring road conditions may cause reduced speeds**

Due to seasonal spring road conditions, motorists may travel on highways that have some areas of broken pavement and traffic speeds reduced throughout North Dakota. Motorists are urged to watch for road signs, obey posted speed limits and slow down according to road conditions.

The North Dakota Department of Transportation (NDDOT) would like to inform motorists to monitor road conditions by visiting the Travel Information Map at <http://www.dot.nd.gov/travel-info-v2/>. Road condition information can also be found by calling 511 from any type of phone while in the state or 1-866-696-3511 from any out-of-state line.
